PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in **machine learning development and software engineering**. Proficient in **Python, Java, JavaScript, and C**, with experience building **scalable AI applications** using **Flask, React.js, RESTful APIs**, and **production-level debugging**. Strong foundation in **Data Structures and Algorithms (DSA)** and **designing optimized, high-performance software solutions**.

EDUCATION

Sri Krishna Institute of Technology — Nov 2022 - Present
Bachelor of Engineering in Artificial Intelligence & Machine Learning — Bangalore
8.32 CGPA
Relevant Courses: Python, AI & ML, GenAI, NLP

Vidya Soudha PU College — Jul 2020 - Jun 2022
Pre-University College — Bangalore
Percentage: 79.32%
Stream: PCMB

SKILLS

- Programming: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS.
- ML/AI: TensorFlow, Keras, PyTorch, Scikit-learn, Hugging Face, OpenCV, NLTK.
- Data Science: NumPy, Pandas, Matplotlib | Databases — MySQL, MongoDB.
- Concepts: ML, Deep Learning, NLP, OOPs, DSA | Tools — Git, GitHub, VS Code, Android Studio.

EXPERIENCE

Test Engineer – Infosys CSR Training | 1.5 Months — Aug 2025 - Oct 2025

- **Completed role-based training in Java, Object-Oriented Programming (OOP), and Data Structures & Algorithms (DSA), solving 30+ coding problems and implementing 10+ real-world programming scenarios, including software testing and QA projects, resulting in a ~25% improvement in problem-solving efficiency.**
- **Designed, executed, and validated 100+ test cases while debugging and optimizing 50+ Java programs, improving code quality, maintainability, and reliability by 20%, and reducing runtime and logical errors by ~15% across practical development and testing tasks.**

PROJECTS

***Emotion Based Music Recommendation System*:** — Aug 2023 - Dec 2023

- **Enhanced** a **real-time emotion interpreter** using a **32,000-image dataset** and a **7-class CNN** running at **25–30 FPS**. **Integrated** it with a **500+ track library** across **7 genres** to deliver **emotion-based music suggestions** within **1 second**.

Diabetes Prediction System: — Sept 2023 - Oct 2023

- **Engineered** a **diagnostic predictor** trained on **70,000+ medical records** using **8 clinical metrics**, achieving **98% Detection Rate**. **Delivered sub-second Low/High-risk classifications**, **boosting early-screening productivity** by **35–40%** and **reducing manual effort** by **~60%**.

Spam Mail Detection System Using NLP & ML: — Aug 2024 - Sept 2024

- **Built** a **large-scale email filtering pipeline** on **100,000+ labeled messages** with **5,000–7,000 TF-IDF** and **embedding features**. **Attained 98–99% Prediction Rate** using **SVM** and **Logistic Regression**, **classifying emails** in **0.3–0.5s** and **enhancing spam-detection efficiency** by **70–80%** while **reducing false positives** by **~40%**.

Brain Tumor Classification System: — Sept 2025 - Dec 2025

- **Trained** a **medical imaging classifier** on **45,000 MRI scans** using a **custom 4-stage CNN**, achieving **86% Success Rate** over **25+ epochs**. **Identifies four tumor types** in **~0.8s** at **128×128 resolution**, **enhancing diagnostic throughput** and **reducing manual review** by **~40%**.

ACHIEVEMENTS:

- ***HackZion V.1 – National CyberSecurity Hackathon, AMC College:*** Built a **24-hour** security toolset in a competition with **300+** participants and **50+** teams, fixing **10+** vulnerabilities and **strengthening** system resilience by **~40%.**
- ***Smart India Hackathon 2025 – Govt. of India:*** **Developed** a **36-hour** prototype from a pool of **50,000+** teams across **70+** ministries, **optimizing** workflow efficiency by **35–40%.**

CERTIFICATIONS:

- **Machine Learning & AI**: Explore ML (Python), ML Foundations, Intro to AI — Nov 2024 – Jan 2025
- **Data Science**: Data Science with Python, Data Analytics with Pandas, Intro to Data Science — Oct 2024 – Feb 2025
